

Environmental Health

ABOUT THE COVER

September is National Preparedness Month (www.ready.gov/ September) and we thought it fitting to highlight this issue's article, "Response, Recovery, and Resilience to Oil Spills and

Environmental Disasters: Exploration and Use of Novel Approaches to Enhance Community Resilience," on the cover. Researchers convened a workshop to examine events following environmental disasters. Focus groups examine three topics related to enhancing resilience to environmental disasters: response and exposure risk characterization, recovery and the role of the citizen scientist, and resilience and community participation. Recommendations from the workshop can improve future response and recovery efforts, as well as strengthen and support community resilience.
